PERSONAL PROJECTS

Airline management system (10/2021 - 10/2021)

- Airline management system will provide the financial and business solution on one platform. It's the package using which you can make reservation, increase your revenue and make future business planning efficiently.
- Its user friendly graphical inter- face helps users to interact with the system and meet their requirements in just few clicks.
- Tech-stack : HTML,CSS,javascript,jQuery
- Code [visit here](#)

Portfolio (09/2021 - 09/2021)

- This personal portfolio website is an extension of my personality and show a strong sense of my skills
- Tech-stack : HTML,CSS,javascript,
- Code [visit here](#)

Library management system (02/2022 - 02/2022)

- Library management system project " is a console application using the C programming language.
- This project compiled in Code Blocks with the GCC compiler. In this console application.
- you can do basic library management task like adding the book, view the added book, search the books, ..etc.
- This application based on file handling in C, where I have used a file-related function like `fopen`, `fread`, `fwrite` etc. Good thing is that "Library management system project" is password-protected, so only authorized person able to login in this application.
